POINT V

D1: US-A-5904075 discloses a power tong (fig. 4) comprising a ring gear (115), a camming surface (120, 130), twin C-shaped cage plates (116), pipe receiving jaw means (102, 104), a sliding jaw (110) and a cam follower (112) arranged just as in claim 1.

Indeed sliding jaw (110) is dimensioned to fit within and pass through the throat in the ring gear to advance to a pipe-engaging position as it is apparent from fig. 4. The same applies also with regard to the sliding jaws of the other embodiments of D1.

Similarly it is apparent from figures 4-7 of D1 that said document discloses also the subject-matter of claims 3 and 4.

In claim 2 a slight constructional change in the power tong of claim 1 is defined 2. which comes within the scope of the customary practice followed by persons skilled in the art, especially as the advantages thus achieved can readily be foreseen. Consequently, the subject-matter of claim 2 lacks an inventive step.

FURTHER REQUIREMENTS

Following has not been observed:

- Rule 6.2 (b) PCT in combination with Guidelines PCT 3 III 4.11, third sentence.
- Rule 5.1 (a) ii) reference in the description to document D1 and its disclosure.
